WORK EXPERIENCE

Web developer Intern — GA Digital Solutions

05/2024 – 06/2024

- Engineered and customized dynamic WordPress pages for a healthcare website, ensuring responsive design and seamless UI across devices. – [Demo](#)
- Collaborated with a cross-functional team to implement client feedback, enhancing user experience and page performance.

Technologies: WordPress, HTML, CSS, JavaScript, Elementor.

PROJECTS

Sekhar Albums - Photo & Album Design Studio Website

[Demo](#)

- Crafted an **elegant, interactive photo and album design studio website** using React, TypeScript, and Tailwind CSS with smooth animations and responsive design.
- Created **comprehensive security features** to protect digital assets, preventing **unauthorized downloads of images** through right-click blocking and drag prevention.
- Integrated **interactive sound effect** that play on user interactions with buttons and links, enhancing the tactile feel of the digital experience.
- **Integrated WhatsApp** for real-time customer communication and **Google Sheets** connection for streamlined contact form data collection.

Technologies: React, TypeScript, Tailwind CSS, Radix UI, React Router, Google Sheets API

Game Explore- Modern Game Discovery Web App

[GitHub](#) | [Demo](#)

- Implemented a **visually engaging and responsive frontend** for a game exploration platform using **React, TypeScript, and Chakra UI**.
- Integrated the **RAWG API** to provide a comprehensive library of games with rich content including **critic ratings, trailers, screenshots, and detailed descriptions**.
- Implemented **infinite scrolling** for seamless Browse of a vast game collection.
- Enabled **real-time search and dynamic filtering** by genre and platform to enhance user experience.

Technologies: React, TypeScript, Chakra UI, RAWG API.

Studio Project Management Application

[Demo](#)

- Architected a responsive web application for studio project management with **role-based access control**, allowing admins, managers, and regular users different permission levels throughout the system.
- Implemented comprehensive **filtering and search functionality** with multi-criteria options including booking orders, studio names, designers, dates, and project status.
- Created **data visualization** components to display key metrics and project statistics with real-time updates.
- Designed an **Excel export** functionality for generating detailed project reports with customized formatting and calculations.
- Designed a dark/light theme toggle for **better user experience** and accessibility across different environments.

Technologies: React, TypeScript, Tailwind CSS, React Router, XLSX, date-fns, Supabase.

SKILLS

Programming Languages : Java, Python, C, TypeScript, JavaScript

Libraries/Frameworks : React, Node.js, Express.js, FastAPI, Redux, Next.js, REST APIs Native, Infrastructure & Tools: Git, Supabase, Firebase, Postman, Linux, Docker

Software Engineering: Scalable systems, code maintainability, debugging, version control

CS Fundamentals: Data Structures, Algorithms, OOP, OS, DBMS

EDUCATION

B.Tech in Electronic and communication at Anits, vizag, AP, CGPA: 8.02

09/2021 – 05/2025

Class 12th in B.I.E.A.P at Sasi Junior College, Percentage: 92%

07/2019 - 07/2021
